“ROLEPLAY on COVID-19 & its Prevention”

DATE:-29/05/2021

TIME:-9.30 AM TO 1 PM.

VENUE:-OPD AREA, NMMC HOSPITAL, VASHI

Coronavirus disease (COVID-19) is an infectious disease caused by a newly discovered coronavirus. Most people infected with the COVID-19 virus will experience mild to moderate respiratory illness and recover without requiring special treatment. Older people and those with underlying medical problems like cardiovascular disease, diabetes, chronic respiratory disease and cancer are more likely to develop serious illness. The best way to prevent and slow down transmission is to be well informed about the COVID-19 virus, the disease it causes and how it spreads. As a health care provider third year Basic B.Sc nursing students presented a roleplay on ‘**COVID-19 AND ITS PREVENTION.** People observed the role play by following Covid-19 protocol and NMMC Staff appreciated students for their efforts.

The roleplay was also conducted in UPHC, Nerul Gaon and Sector 22 of Nerul to create awareness among vast number of people.
